Always-on, dedicated, secure and reliable network connectivity can help your business thrive. Router optimization can support speeds up to 400 Mbps. Quality-of-service (QoS) options and service level agreements (SLAs) prioritize your applications and network traffic. Flexible or fixed pricing options allow you to adapt to changes in your network usage patterns. Internet connectivity is the lifeblood of your business. Now you can enhance it with an affordable, easy-to-use and powerful networking and security solution that is designed for growing companies.

Here’s how the solution works.

Verizon Internet Dedicated Services provides the reliable internet connectivity that keeps your business connected.

4G LTE wireless backup
4G LTE wireless backup is built into Cisco® Meraki® hardware and fully configured with SIM activation.

Automatic failover
Automatic failover backup on the nation’s most reliable 4G LTE network helps keep your critical applications connected.

Up to 10 Gbps of data
1 Gbps of data is included and additional plans of up to 10 Gbps are available.

1 4G LTE wireless backup speeds are limited to 10 Mbps or lower and may not support all normal business activities.

2 Based on RootMetrics® by IHS Markit’s RootScore® Reports: 2H 2019. Tested with best commercially available smartphones on four national mobile networks across all available network types. Experiences may vary. RootMetrics awards are not an endorsement of Verizon.
