Define your Digital Destination.

Use Digital Advisory Services to map out your software defined networking journey.

Everyone is going digital. Businesses across every industry know that to stay ahead of the competition, they must also stay ahead of each new wave of disruption, and do digital better. To be successful, you have to move fast. How quickly can you get that new application out to your customers? How easily can your employees access the tools they need to be efficient and productive?

With software defined WAN (SD WAN) and virtualization, you can quickly scale your environment, centralize management and better control costs. SD WAN can also make it easier to build a, maintain security, take advantage of advanced capabilities and create new revenue models. It’s a game changer, but it can be difficult to know how to get started.

That’s exactly why we’ve developed our Software Defined WAN Awareness Workshop to help introduce you to the benefits and possibilities of SD WAN without getting overwhelmed. During this half-day session, we’ll help you:

- Better understand the IT and business benefits of SD WAN and virtualization.
- Explore industry challenges and trends.
- Understand different solutions, industry standards and best practices, and then learn how to put it all into play.
- Set the foundation for your journey.

We work closely with Cisco to assess, design and provide solutions that meet your business and technology needs.

TAILOR THE SD WAN WORKSHOP TO YOUR NEEDS.

Because SD WAN offers so many possibilities, we’ll tailor your Awareness Workshop to align with your goals, resources and company culture. Before the workshop, we’ll work with you to help identify the key stakeholders in your organization that can benefit from participating. For this introductory workshop (which is only $2,500 plus travel and expenses), we’ll have presentations for you and roundtable discussions with our experts on the following:

- Introduction to SD WAN and an overview of the market landscape
- Review of notable SD WAN use cases, challenges and solutions
- Exploration of ways SD WAN can benefit your business and help you reach goals
GREATER SUPPORT, GREATER VALUE

The SD WAN Awareness Workshop is a great first step, but it doesn’t have to stop there. If you’re already thinking long-term, and know that SD WAN is the future of your business, we also offer a flexible advisory program that will help you get the most out of your investment.

Our Digital Advisory Services program taps into our global network of experts and is designed to help give you the support you need across your entire virtualization journey. Not only will you get the SD WAN Awareness Workshop at no additional cost, but you’ll also get on-demand access to a dedicated consultant to keep the momentum going. Whether you’re at the strategy and roadmap, assessment, design or implementation phase of your journey, you’ll have access to the support you need. Simply choose the service level that best suits your specific needs and budget, and we’ll help you unlock the benefits of SD WAN and start driving the type of results that will keep you ahead of the competition.

Intelligent SD WAN: The Smart Investment

CISCO AND VERIZON JOINTLY DESIGN, DELIVER AND IMPROVE SD WAN SOLUTIONS.

With our joint investment in R&D, you get rigorously tested solutions before they are deployed. Reduce the complexity of process and managing multiple providers using our combined management workflows, getting solutions deployed reliably and hassle-free. Once deployed, our day 2 support, optimization, and proactive management improve performance and reduce risk. When you can’t compromise on the most important projects, bet on the best. Cisco and Verizon, where delivering better matters.
