

# Connect. Secure. Improve.

FACT SHEET

## Digital Advisory Services for Software Defined WAN

*Designed. Delivered. Optimized. Together.*

We live in an era of digital disruption. Cloud, mobility and emerging technologies have changed the way you need to look at business and your network. Competition and new market entrants use emerging technologies to turn the market upside down and get ahead. The digital disruption also gives you opportunities to innovate, build new business models and launch game-changing services. Those who don't take advantage of these new technologies and opportunities may get left behind.

Key among these disruptive digital technologies are software defined WAN (SD WAN) and network virtualization. They let you create faster, more agile networks that can help you scale quickly, improve time to market, easily expand with new services, improve digital experiences and much more. SD WAN and network virtualization can also help you transform complex environments into simple ones that require fewer management resources, help you better control costs and improve bandwidth utilization and app performance.

**300+ network  
consulting professionals  
around the globe**

---

**Gain on-demand SD WAN and network virtualization expertise to help you choose, plan and execute the right technology initiatives for your business.**

---

But often one of the hardest questions to answer is how do you best take advantage of SD WAN and network virtualization? The answer begins with our Digital Advisory Services. From strategy to implementation, we offer a broad array of services and offerings to help you get the most you can from digital disruption. We tailor those offerings to benefit your unique needs and give you ongoing, on-demand access to a network expert.

## REACH YOUR GOALS WITH EASE AND CONFIDENCE.

Whether you're looking to drive better customer engagement, make your entire operation more efficient or transform the business landscape, we can help. When you take advantage of Digital Advisory Services, you get:

- Quick access to an experienced SD WAN and network virtualization consultant
- Best-practices advice for your in-house team • Better understanding of your actual needs before you deploy SD WAN and network virtualization technologies
- Predictable budgeting for network consulting
- Peace of mind even when significant network changes are needed
- Easy access to additional contracted professional services

## TAKE YOUR NETWORK WHERE YOUR BUSINESS NEEDS IT TO GO.

Our experienced and skilled consultants help you address the different challenges that can arise from conception to deployment. You can rely on our in-depth knowledge and expertise to support you in all the following areas:

- Enterprise networking
- SD WAN and network virtualization
- Wireless local area networking
- Cellular wide area networking
- IPv6 adoption
- Network vulnerability
- Network application performance analysis
- IP transformation
- Cloud and virtualized services

## GET ON-DEMAND DIGITAL HELP WHERE AND WHEN YOU NEED IT.

Our Digital Advisory Services offerings are designed to help you no matter where you are on your digital transformation journey.

You get ondemand access to a world of digital expertise and intelligence. And we have the flexibility and agility to let you focus on your unique needs.

- SD WAN Awareness Workshop
- SD WAN Strategy and Roadmap
- SD WAN Assessment
- SD WAN Design
- SD WAN Implementation

## Why Verizon

We were a founding member and serve on the board of the Open Networking Foundation (ONF) – the industry organization that sets the SD WAN standards. We work closely with major SD WAN vendors to assess, design and provide solutions that meet your business and technology needs. We're also a global leader in designing, implementing and improving solutions for advanced networks. With more than 300 network consulting professionals around the globe – and one of the world's largest IP backbones – we can help you understand your SD WAN and network virtualization needs and quickly execute on them. Our experts can help you create a flexible, intelligent and agile network that provides the secure and reliable connectivity needed to power your organization now and in the future.
