

Cyber attacks are a reality. Are you ready for them?

Executive Breach Simulation.

It's an unfortunate fact: cyber attacks happen and they happen often, threatening critical data. Knowing when incidents might occur—and whether you're prepared to defend against them—can make all the difference.

Can you stop a breach before it stops your business? Periodic testing to evaluate your plan is the only way to know. It's no longer safe to assume—you've got to know your plan works.

A real way to find out if you're really prepared.

Our Executive Breach Simulation service assesses your current incident response plan to help improve your security capabilities and processes. Verizon RISK¹ Team consultants conduct a mock breach exercise to identify gaps in your plan.

Learn where your incident response plan has gaps – and where it excels – by conducting a mock breach with the Executive Breach Simulation.

1. Research, Investigations, Solutions, Knowledge.

100k

incidents. Our RISK Team has collected and examined security incident data for more than a decade.

We test your preparedness for handling a variety of IT security incidents, including data breaches, to help you:

- Identify gaps in your plan using containment, eradication and recovery measures
- Define stakeholder roles and establish communication and escalation processes
- Boost collaboration by identifying required coordination efforts and making sure stakeholders are aware of their responsibilities
- Advance your security agenda by increasing executive awareness

Test thoroughly. Rest assured.

As the threat landscape evolves, regular testing of your incident response plan is the best way to plan for future threats.

The Executive Breach Simulation lets you test run your defense plan against real-world breach simulations, helping you prepare for an actual attack and prove your readiness.

The RISK Team's knowledge and skills are used to protect organizations around the world. We're dedicated to:

- Researching the ever-changing risk environment
- Investigating and responding to security incidents
- Developing Solutions based on credible data and analysis
- Cultivating Knowledge within Verizon, our clients, and the security community
