

Samsung Knox Manage

Cloud-based, end-to-end security from Knox Manage delivers peace of mind.

Mobile security doesn't have to be complicated. Samsung Knox™ Manage is a bundle of security and management tools that takes the complexity out of securing the phones and other devices your employees use every day.

Knox Manage is Samsung's new cloud-based, cross-platform enterprise mobility management (EMM) solution designed to replace Knox Premium.¹ Knox Manage helps IT administrators manage smartphones, tablets and other mobile devices across several different operating systems, including:

- Android™
- iOS
- Windows® 10
- Tizen (coming soon)

Knox Manage allows IT administrators to remotely manage devices from a cloud-based command center, so they can:

- Remotely manage which apps employees download and use.
- Enroll hundreds of devices at once.
- Store data in separate work and personal containers.
- Locate, lock and wipe devices remotely.

Key benefits

- Easy cloud administration
- Separate, company-controlled workspaces
- Select features available for non-Samsung® Android and iOS devices
- Cost-effective, scalable deployment

Cloud-based device and app management

A simple console allows admins to take advantage of a rich set of IT policies to easily deploy, manage and control access to any application.

Separate containers for your data

Workspace containers allow users and admins to keep sensitive company data encrypted and separate from personal data such as photos, contacts and messages.

Cross-platform flexibility

Satisfy security requirements without compromising employee privacy for every device, whether it is a company-owned Android phone or a personally owned iOS device.

Highly cost-effective

Knox Manage has low-cost license fees and simple deployment, helping companies secure devices without breaking their budgets.

Updated features

Knox Manage gives administrators new features, including:

- Event-based device management (such as blocking cameras during business hours)
- Active device monitoring and remote device support with GPS tracking (with employee consent)
- Kiosk Wizard for device customization, including corporate-branding look and feel (allowing enterprises to easily create a branded, locked-down kiosk for customer use)

About the Samsung Knox security platform

Samsung Knox provides multiple built-in layers of protection on Samsung devices for safety and security out of the box.

Designed in a TrustZone-based Integrity Measurement Architecture, security features include:

- Secure Boot/Trusted Boot
- TrustZone-based KeyStore
- TrustZone-based on-device encryption
- Hardware-based attestation
- SE for Android Management Service
- Common Access Card

Tested, trusted and proven

Gartner gave Samsung Knox the most “strong” ratings of any platform for Corporate Managed Security. Samsung Knox is also the only platform that received “strong” ratings for every security control listed in the Corporate Managed Security category.²

¹ Samsung will support Knox Premium through 2019.
