

Help keep large field teams connected with Mobile Command Center 2.0.

Flyer

A rugged and reliable mobile communication solution built for tough conditions

Your teams need a more reliable way to communicate, especially when they're on the go and at the edge of wireless networks. Weatherproof, rugged mobile solutions that you can easily move and quickly deploy provide better connectivity and communication.

That's why Verizon has partnered with Connected Solutions Group to offer the Mobile Command Center (MCC) 2.0. This on-demand mobile network and call center is designed to support teams with rapid deployment and more reliable mobile communications.

MCC 2.0 harnesses the Verizon Wireless network for faster, more reliable connectivity, even in remote locations and harsh conditions.

Power and connectivity in a deployable solution

The Mobile Command Center 2.0 is equipped with a suite of modular components to deliver power and improve connectivity and communication.
