

Set up jobsite communications before and after the work begins.

Flyer

On-demand mobile networks help you manage challenging and remote projects.

Keeping all the moving parts—supplies, people, schedule—in sync at a construction site requires close coordination, communication and remote data access to cloud-based information and tools. Rugged Mobile Command Center (MCC) solutions from Verizon tech partner Connected Solutions Group (CSG) help your contractors and subcontractors stay connected throughout all project phases.

Verizon has partnered with CSG to offer the Mobile Command Center 2.0, Mobile Command Center Mini and Mobile Command Center Mini Advanced. Three rugged command center versions are available to help meet the construction industry's communication and connectivity challenges. These portable, rapid-deploy solutions help deliver fast connectivity over the Verizon 4G LTE network, even in remote locations.

Portable, rugged and purpose built

The Mobile Command Center 2.0 delivers power, connectivity and Voice over IP (VoIP) phones. Its suite of modular components includes:

- Two detachable Yealink® handsets that work with Verizon One Talk
- An IP67-rated mobile case for weatherproof and drop-resistant durability
- Convenient wheel-behind case design and TSA-compliant size for easy delivery
- Durable, reinforced steel hinges that are built to serve in tough environments
- Appropriate router provided with MCC unit
- Standard 64,000-mAh battery
- External, weatherproof charging and data ports
- Interior LED lighting for nighttime visibility

Lightweight, reliable and compact

The Mobile Command Center Mini and Mini Advanced support up to 10 and 25 users, respectively, and are equipped with:

- An IP67-rated mobile case for weatherproof and drop-resistant durability
- An integrated router
- External, weatherproof charging and data ports
- A built-in, protected high-gain antenna to help deliver higher speeds and wider coverage, minimizing the risk associated with delicate stick-and-paddle antennas
- Heavy-duty plastic internals to provide anti-shock protection to the router and battery
- A long-lasting 11,000-mAh battery
