

Verizon connectivity – even in remote locations

A lightweight, rugged and reliable mobile communication solution built for tough conditions

Flyer

Your field teams need reliable ways to communicate, especially when they're working in harsh conditions at the edge of wireless networks. These tough environments require rugged and reliable solutions that you can easily move and rapidly deploy to provide better connectivity and communication.

That's why Verizon has partnered with Connected Solutions Group to offer the Mobile Command Center Mini, a rapid-deploy portable solution that harnesses the Verizon Wireless network for faster, more reliable connectivity.

A rugged, lightweight LTE deployable, the Mini is built for size, performance and cost. And it's designed to be deployed while "closed" for ultimate protection in harsh conditions.

The Mobile Command Center Mini and the Mini Advanced are rugged and lightweight rapid-deploy solutions that harness the Verizon Wireless network for faster, more reliable connectivity.

Learn more:

Mobile Command Center solutions are available within the U.S. Contact your Verizon Business Account Manager for details.

The Mobile Command Center Mini is equipped with:

-  An IP67-rated mobile case for weatherproof and drop-resistant durability
-  An integrated router
-  External, weatherproof charging and data ports, always ready when needed
-  A custom-designed, built-in high-gain antenna to help deliver higher speeds and wider coverage, minimizing the risk associated with delicate stick-and-paddle antennas
-  Heavy-duty plastic internals provide anti-shock protection to the router and battery
-  A long-lasting 11,000-mAh battery

NOTE: We offer two Mini product versions: The Mobile Command Center Mini supports up to 10 users. For those who need more, there's the Mobile Command Center Mini Advanced, which can support anywhere from 10 to 25 users.
