Introducing Ethernet Dedicated E-Line.

We’ve used software-defined networking techniques to redefine point-to-point connections over our highly reliable global network.

Connecting users to apps simply, securely, and reliably.

You need predictable latency for financial apps tied to dynamic markets.

$3x The median cost of latency more than tripled from 1995 to 2005. 2

You need a secure connection for payment transactions.

97% of retail IT executives consider managing data security one of their top five considerations. 4

You need the security of a private connection for electronic protected health information.

60-70% of the Internet and Video will consume: 5

Take advantage of our reliable global network.

Ethernet Dedicated E-Line is available in many major markets around the world.

At less than the cost of many private-line connections, Ethernet Dedicated E-Line provides a reliable path for your business applications.
