

Empower your people for greater productivity and job satisfaction.

verizon^v

Whether it's employees wanting a better work/life balance or colleagues that are always on the road, work is no longer 9-to-5 or tied to a single location. Advanced collaboration tools mean employees can be productive virtually anywhere and on whatever device they're using. If your company isn't taking advantage of that you'll struggle to recruit the best talent and risk losing your competitive advantage.

105M

Mobile workers

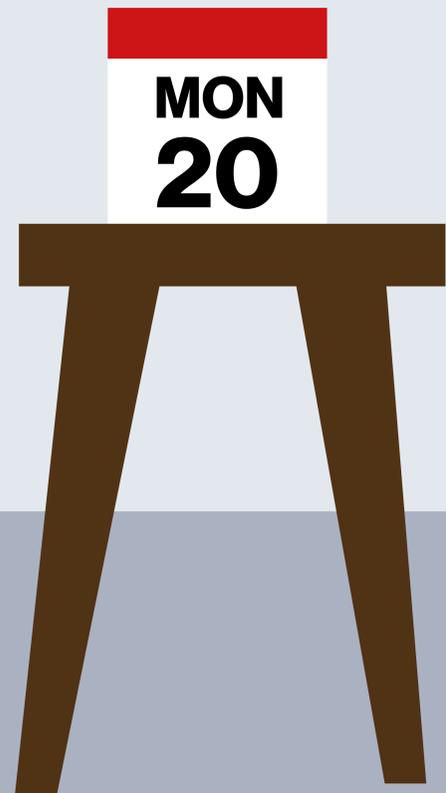

=

72%

of the U.S. workforce

According to IDC, by 2020 nearly three-quarters of jobs will be mobile.¹

And that's creating real advantages in productivity.

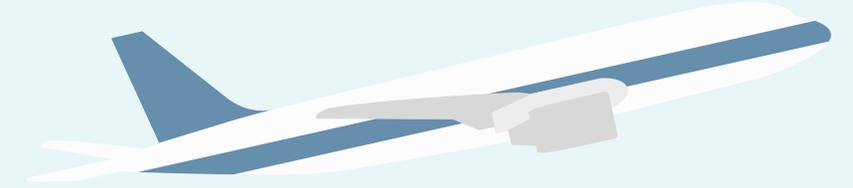

¹IDC, U.S. Mobile Worker Population Forecast, 2016–2020

60%

of respondents in a recent survey said mobile technology makes them more productive.²

Departures		TUE 21
1000	LOS ANGELES	
1020	PARIS	
1100	HONG KONG	

²The Economist Intelligence Unit, Mobility, Performance and engagement, 2016

47x

Workers who reach a state of "cognitive flow" can be nearly 50 times more productive than their peers.³

Is your communications infrastructure up to the job?

If you give employees fast and convenient access to the information they need, they'll not only be more productive they'll be happier too.

Your business needs an agile infrastructure that can:

- **Enable collaboration from virtually anywhere.**
- **Adapt to changing demands.**
- **Deliver reliability and security.**

³Forrester, Elevate Human Performance With Workforce Enablement, Executive Overview: The Workforce Enablement Playbook, May 2016

**As the workplace evolves,
so should your technology.**

Software-defined networking

**Deliver fast, reliable user
experiences while controlling
costs.**

Advanced analytics

**Unleash the insight trapped in your
data to understand your customers
and your business better.**
