

Upgrading your water system is easier than you think.

With Grid Wide: Intelligent Water, you're ready.

Grid Wide: Intelligent Water simplifies the modernization process. This Internet of Things (IoT) platform-as-a-service offering delivers actionable insights that help utilities remotely monitor water consumption, reduce nonrevenue water and improve infrastructure and sustainability efforts. Are you ready?

6 billion gallons of treated water are lost every day due to leaking pipes.¹

What does 6 billion gallons of water look like?

- 120 million bathtubs at 50 gallons per bathtub
- Filling the Rose Bowl 71 times with 84+ million gallons each time

Growing demand demands growth.

As water consumption grows, utilities have to find new ways to manage the demand.

Grid Wide allows you to:

- Detect leaks
- Manage water quality
- Monitor consumption
- Remotely monitor assets
- Get daily and interval meter reads
- Get event notifications, analytics and reporting
- Deploy smart meters

Verizon manages and hosts it all.

Grid Wide is a platform-as-a-service offering. So you use only what you need.

It can help:

- Improve conservation
- Increase efficiency
- Improve quality of supply
- Reduce nonrevenue water
- Enhance your customer service

No need for:

- High capital investments
- Specialized hardware
- Long deployment times

With Grid Wide: Intelligent Water, you're ready.

Give your customers better service with an intelligent water system running on a better network.

2.56 million square miles

Year after year, Verizon is recognized as the largest and most reliable 4G LTE network. Our 4G LTE network covers over 2.56 million square miles—the largest in America.

Verizon was ranked #1 nationwide by RootMetrics in overall network performance (12 times in a row).²

In fact, 97% of the Fortune 500 rely on our services and technologies.

RootMetrics® RootScore® Award Winner

Why Verizon?

More coverage, fast speeds and reliable connections. So you can connect what matters, with help from a trusted partner. Verizon.
