

Enhance your business efficiency with a communications upgrade.

Solutions brief

World-class voice, high-performance Internet services, and support—in one package.

Ever wonder how far ahead of the competition you'd find your business with a flexible, secure Internet and voice solution? Our cost-effective Business Connection solution bundles high-bandwidth Internet Dedicated Services and Voice over IP (VoIP) with productivity-enhancing communications features.

With our reliable IP network as the foundation for your voice, data, and Internet needs and worry-free, 24x7 support from Verizon, you'll have the performance and functionality you need that means you can shift your focus to business growth and innovation while Business Connection helps you enhance collaboration and business processes, operate more efficiently, and control costs.

The bird's eye view.

So what exactly does this solution include? Business Connection is a complete bundle that provides the following:

- Internet Dedicated Services, with Quality of Service (QoS) and bandwidth speeds up to 100 Mbps (T1 or Ethernet)
- VoIP packages with four to 48 concurrent call paths and calling features, including call waiting, transfer, forwarding, caller ID, and three-way calling, as well as a bucket of long-distance minutes and unlimited local calling to manage costs
- Simple, affordable migration from your key or private branch exchange (PBX) phone system
- Easy access to the Internet via an ADTRAN Integrated Access Device with firewall security and Verizon installation, design, configuration, and ongoing maintenance services
- Extensive service level agreements (SLAs) for Internet and VoIP performance and reliability

Easy migration to VoIP.

Verizon's award-winning VoIP services simplify network management and help your business operate more efficiently

by converging voice and data traffic over the same IP network connection. VoIP offers a more robust and cost-effective communications experience while easily integrating with your existing telephone system. Plus, 24x7 support and access to online reporting tools are included.

Secure internet dedicated services.

Verizon Internet Dedicated Services delivers the network reliability you need to take your business to the next level. Our full-time, dedicated Internet service provides high quality, scalability, and performance. Backed by competitive SLAs, it's ideal for business-critical operations.

Exceptional service, security, and control.

Keep tabs on Internet use and performance from a convenient user portal. Our intuitive reports provide a comprehensive view of your usage. Don't worry, though: You're never wholly on your own. With expertise from a global network service provider at hand, you can drive growth and business performance while we do the rest. We'll install and maintain your solution, including 24x7 proactive monitoring of your Internet service.

800,000+

route miles: our reliable networks carry voice, data, and internet across six continents.

Control costs and get more done in a day with Business Connection.

Why partner with Verizon?

As your business grows, you'll find our experience and communications expertise invaluable. We own and operate one of the world's largest local-to-global IP networks. Delivering IP, data, and voice services in more than 150 countries— that's just one of the reasons we're a trusted information technology partner for 98 percent of the Fortune 500. Our consultative approach and 20+ years of network management experience will help you understand and analyze a full range of cost-effective services. We'll partner with you to design, plan, implement, and manage your network services so you can focus on business growth.
