

Rugged and reliable mobile communication solutions, built for tough conditions

Solution brief

Stronger mobile networks help you stay connected with your teams, where work takes them.

Your teams need a more reliable way to communicate, especially when they're on the go and at the edge of wireless networks. Weatherproof, rugged mobile solutions that you can easily move and quickly deploy provide better connectivity and communication.

Verizon has partnered with Connected Solutions Group (CSG) to offer Mobile Command Center 2.0, Mobile Command Center Mini and Mobile Command Center Mini Advanced.

These three rugged, portable command center versions are available to support your team with rapid deployment and faster, more reliable connectivity over the Verizon network, even in remote and harsh locations.

While you may not be able to control unpredictable events, our Mobile Command Center solutions put you in control of your communications to help you mobilize your teams in the field, stay connected and be ready to tackle the unpredictable situations that come your way.

Mobile Command Center Mini

Mobile Command Center 2.0: Portable, rugged and purpose-built

The Mobile Command Center 2.0 delivers power and stronger connectivity. Its suite of modular components includes:

- Two detachable Yealink Handsets that work with Verizon One Talk
- An IP67 rated mobile case for weatherproof and drop-resistant durability
- Convenient wheel-behind case design and TSA-compliant size for easy delivery
- Durable, reinforced steel hinges that are built to serve in tough environments
- Appropriate router provided with Mobile Command Center unit
- Standard 64,000 mAh battery
- External, weatherproof charging and data ports
- Interior LED lighting for nighttime visibility

Mobile Command Center Mini and Mobile Command Center Mini Advanced: Lightweight, reliable and compact

The Mobile Command Center Mini and Mobile Command Center Mini Advanced support up to 10 and 25 users, respectively, and are equipped with:

- An IP67 rated mobile case for weatherproof and drop-resistant durability
- An integrated router
- External, weatherproof charging and data ports
- A built-in, protected high-gain antenna to help deliver higher speeds and wider coverage, minimizing the risk associated with delicate stick and paddle antennas
- Heavy-duty plastic internals to provide antishock protection to the router and battery
- A long lasting 11,000 mAh battery

Mobile Command Center 2.0

Improving connectivity and communications aids dispersed workforces across industries.

Reliable and connected communication tools in any industry can help unite a dispersed workforce to improve performance, ultimately saving time and helping you better manage resources, labor and fuel costs. That kind of efficiency translates into a business advantage, no matter your industry.

Construction

Keeping your construction projects on time and on budget can be a challenge, especially when you have multiple projects, work crews and job sites to manage. Having reliable, connected communication solutions can help your workers respond and perform at higher levels to help you stay on track and meet your deadlines.

Utilities/Energy

People depend on electricity and water. When the system goes down due to a leak or a power outage, they expect you to know about it and quickly resolve it. Mobile communications make it easier for your teams to collaborate so you can deliver resources more efficiently.

Healthcare

Whether you're assisting patients in remote areas or mobilizing to support a health crisis response, you need to keep services and communications moving forward. Having the right mobile solution in place is key.

Why Verizon

When you deploy a Mobile Command Center solution offered by Verizon, you can get the benefit of combining a mobile workforce solution with our world-class network. Available in 500+ markets and covering over 98 percent of the U.S. population, our 4G LTE network and technology solutions work together to help field teams in many industries collaborate more effectively and boost productivity.

With the nation's most awarded network and your choice of communication solutions, it's easy to keep your workforce productive and connected.
