

# Keep your business connected and protected.

Solution brief

## Easy-to-manage Verizon Internet Dedicated Services with Cisco Meraki and 4G LTE backup keeps your business running securely.

Whether you are opening a new location or upgrading an existing one, your internet connectivity is the lifeblood of your business. Now you can support your business with a simple and powerful networking solution designed for growing companies.

Verizon Internet Dedicated Services with Cisco® Meraki® and 4G LTE backup gives you a complete networking and security solution that is easily managed, reliable and cost-effective:

Make sure your business stays connected and secure with dedicated and reliable network connectivity.

Keep your customers connected and your premises more secure with the latest routing hardware plus Wi-Fi and security cameras.

Protect your network, company data and customer data with an integrated next-generation firewall that delivers state-of-the-art security.

Run your business more efficiently with the Meraki cloud-based dashboard, which offers detailed network metrics, real-time data and simplified self-management.

Ensure that your most critical applications stay connected with 4G LTE backup provided by Verizon's award-winning wireless network.

Keep things running smoothly with installation, technical support and virtually 24/7 concierge service from Verizon Care.

---

### Keep your business connected with a dedicated, secure and reliable network solution.

Verizon Internet Dedicated Services with 4G LTE backup gives you the internet connectivity you need to support your most demanding applications:

- Always-on, dedicated internet connectivity
- Quality of service (QoS) to support key applications with robust service level agreements (SLAs)
- Router optimization supporting speeds up to 400 Mbps

---

### Get peace of mind with 4G LTE backup.

If you lose internet connectivity, your business can slow to a crawl. Or stop altogether. With automatic failover backup on the nation's most reliable 4G LTE network, you get the assurance that your most critical applications can stay connected:

- 4G LTE backup built into Meraki hardware, delivered and fully configured with SIM activation
- 1 Gbps of data included (additional plans of up to 10 Gbps available for an additional cost)
- Automatic failover for business continuity<sup>1</sup>

### Support business growth with the latest Meraki network hardware and software that is easy to use and scales to meet your needs.

With Cisco Meraki, you get the latest network routing hardware and SD-WAN connectivity that is secure and easy to manage and scale, including:

- Access points
- Switches
- Security appliances
- Enterprise mobility management
- Security cameras

Cisco Meraki's integrated hardware, software and cloud services deliver ease of use, reliability and security, while helping to future-proof your network. These include:

- Simplified provisioning of multiple network elements and scalability for businesses large or small
- A cloud-based, intuitive dashboard that provides in-depth insights into networks and simplifies self-management
- WAN connectivity with built-in firewall software preloaded on the accompanying hardware
- Support for multiple-client environments and comprehensive device management
- Location analytics to help improve customer engagement and loyalty across sites
- State-of-the-art security through Unified Threat Management with Meraki MX
- Regular feature upgrades and security updates that help future-proof your network investment

### Leading support from Verizon Care

Verizon Internet Dedicated Services with Meraki and 4G LTE backup includes virtually 24/7 installation and technical support and “white glove” concierge service from Verizon Care.

**Verizon Internet Dedicated Services with Cisco Meraki and 4G LTE backup gives you an affordable, easy-to-use networking and security solution powered by the nation's most reliable network.<sup>2</sup>**
