

Cisco Jabber

How Do I Receive Calls in Jabber Mobile for Apple iOS?

Note: To be able to receive incoming phone calls in Jabber, your mobile phone must be [enabled for phone services](#).

This is how you can accept a call using Jabber.

1. When someone calls you on Jabber, you will receive a call notification. Click on **Answer** to receive the call in Jabber.

2. You will have **Call Control** options at the bottom of the screen to either **Mute, place call on Hold, End the Call**, etc.
