

Cisco Jabber

How Do I Block Users in Jabber?

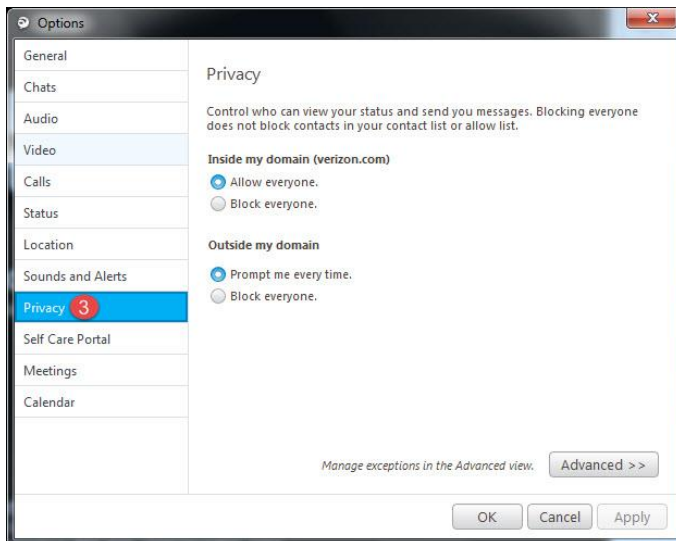

To Block users in Jabber, follow these simple steps.

When you block someone, they will be unable to chat with you, or see your Jabber presence availability.

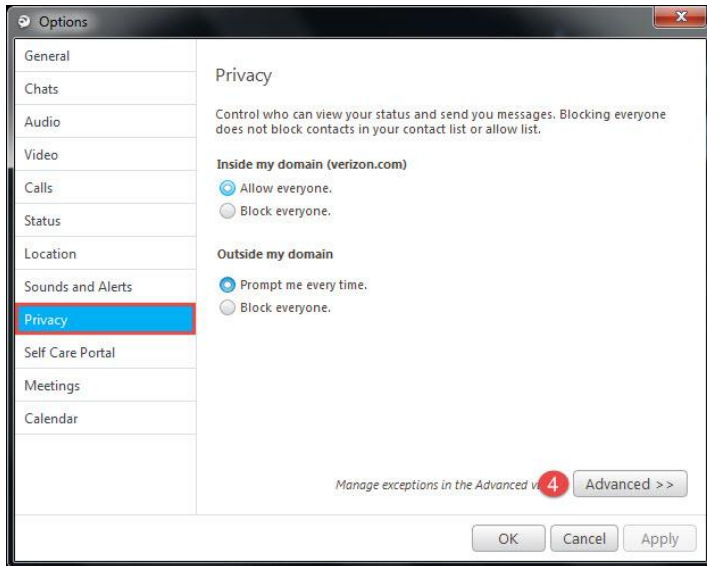

1. Click on the **gear icon** in your Jabber window.
2. Go to **File > Options**.

3. Select **Privacy**. In the Privacy settings, you can control who can view your status and send messages.

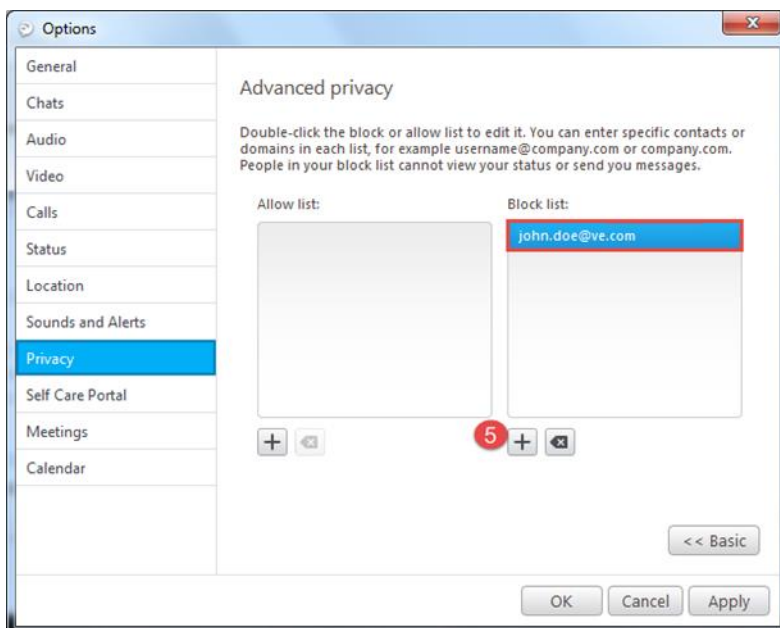

- To just block a specific person, click on the **Advanced** button.

- Hit the **plus sign (+)** in the block list and add the user's **Jabber Chat IM address**

Note: To find the user's IM address, just right click on the name in the Jabber contact list or directory and select **View Profile**. The address will be listed next to **Chat (IM address)**.

- Click **Apply** and **OK** when finished.
- When you try to send a message to someone who is on your block list, you will get a message below.
