

# Cisco Jabber

## How Do I Disable the Jabber Docked Window?

Jabber is automatically setup to enable the **Jabber Docked Window**. With this is enabled, you'll see a small Jabber call window at the top of your screen.

**Example:**

**To disable and turn off:**

1. In your Jabber window, click on **Options (Gear icon)**.
2. Hover your mouse over **View** and click on **Show Docked Window**. This will uncheck the option to show Jabber Docked Window.
