

Cisco Jabber

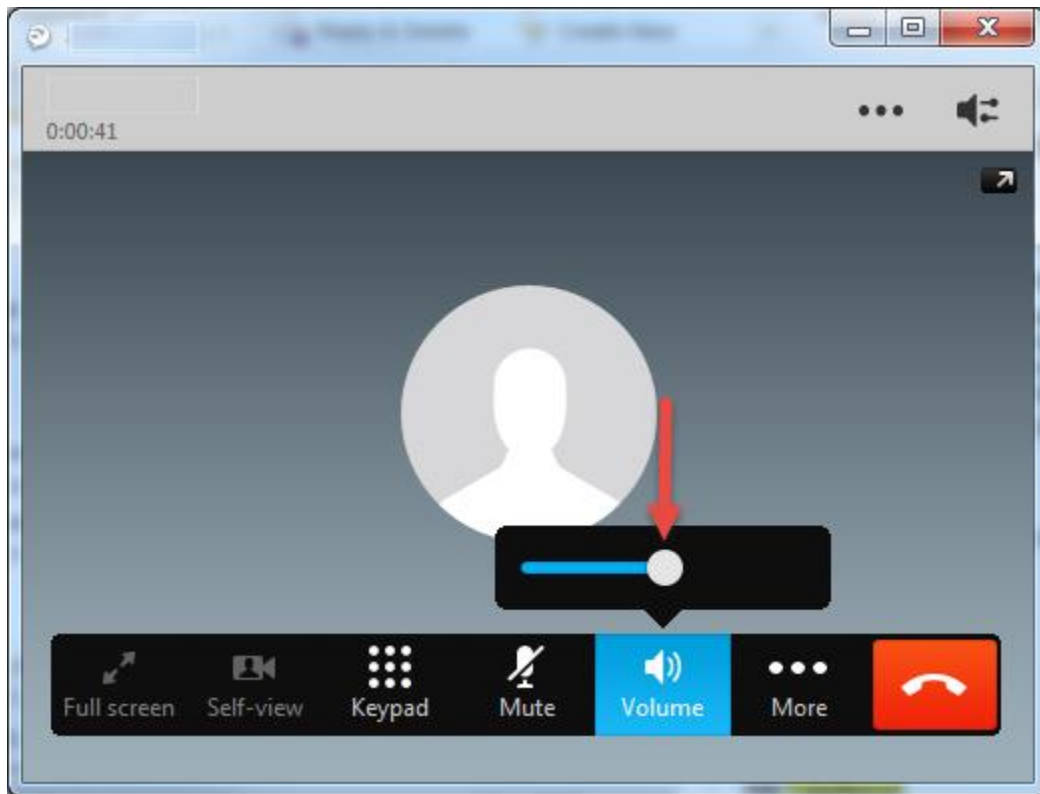

How Do I Adjust My Call Volume in Jabber?

To adjust the Jabber volume for phone and video calls, follow the steps below.

1. In the Jabber call window, click on **Volume**.

2. The **volume slider** will appear. Move the slider to the right to increase the volume and move to the left to decrease.

3. Another option is to go to the Jabber main window gear icon and go to **File > Options**.

4. Select **Audio** and adjust the volume slider.
