

Cisco Jabber

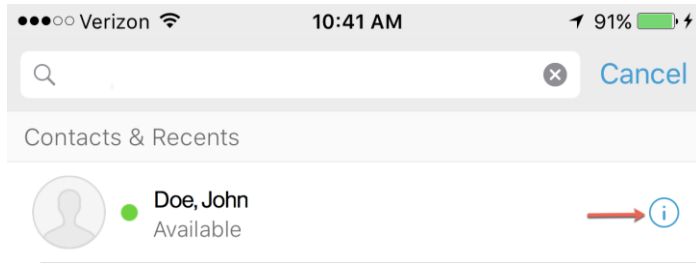

How to Make a Call in Jabber Mobile for Apple iOS

Follow the steps below to make a phone call in Jabber Mobile for Apple iOS:

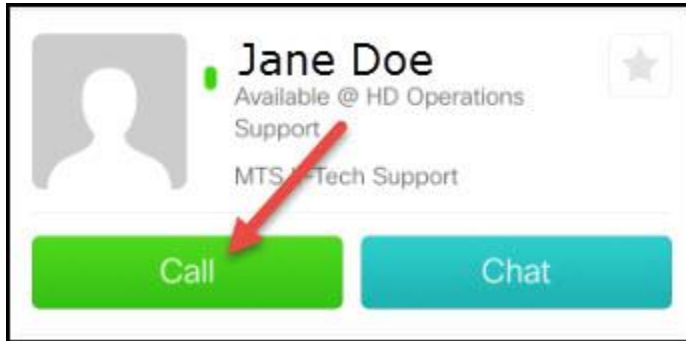

1. To start a call, search for your **contact**.
Note: Search by name, email address, or choose from your contact list.

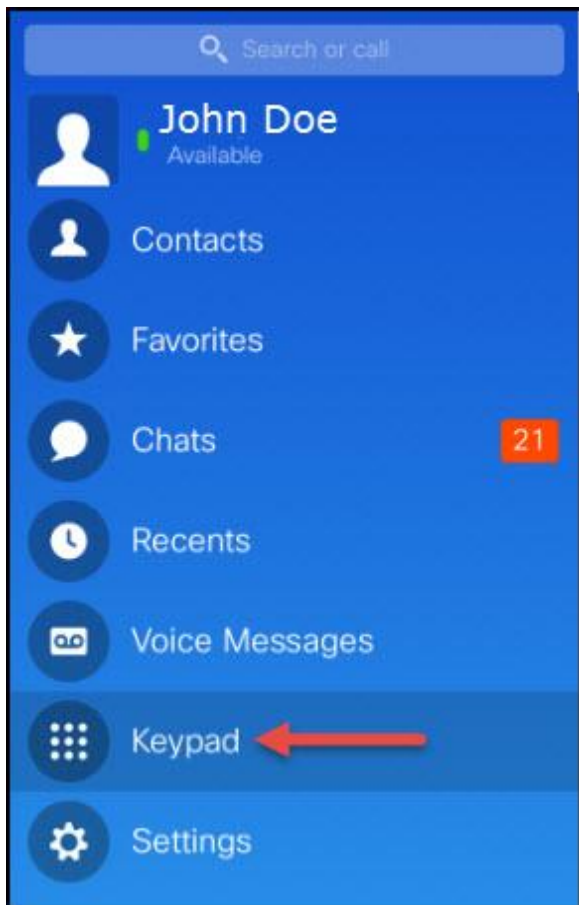

2. When the contact is found, Click on **More Info button**.

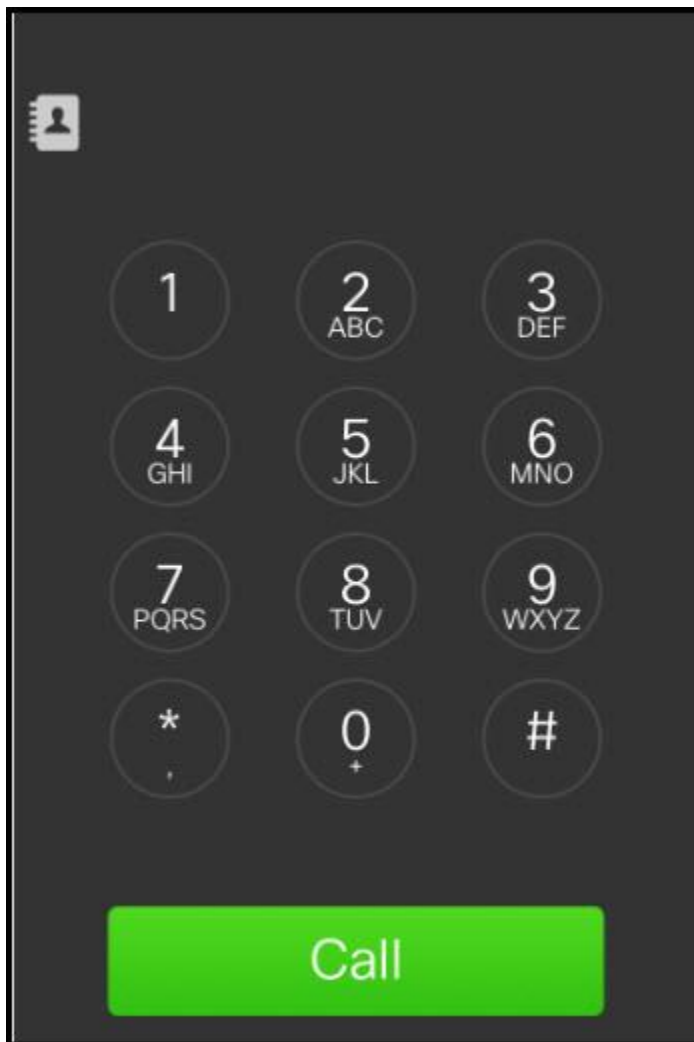

3. Click on **Call button** in the contact person's info.

4. Another option is to click on **Keypad** in your Jabber Window.

Manually dial the **phone number** and Click on **Call**.

5. Once your call is properly placed, you will have Call Control options at the bottom of the screen.
