

Cisco Jabber

New Chat Messages Do Not Appear in a New Window in Jabber

There currently is no automatic feature in Jabber chat to set all incoming chat messages in a new window. All multiple messages will be in the Jabber Chat conversation window with tabs.

However, you can manually show the chat in a new window. To manually pop out the chat conversation:

1. In your chat conversation window, Select and click the **'Show this chat in new window'** button. This will show your conversation in a new window.
