

# Cisco Jabber

## How Do I Get the Number Keypad to Show in Jabber While In A Call?

You can easily access the number keypad in Jabber with these steps.

**Note:** If you are having trouble locating the keypad when you place or receive a call, your Call/Conversation Window may not be appearing automatically. Please see the article [How To Make The Jabber Call Window Appear When Placing or Receiving a Call](#).

1. While on a call in Jabber, click on the **Show Keypad** button in your Jabber Call window screen.

2. The number keypad will appear. Enter the numbers for your call.

To close the number keypad, just click on the **keypad** button again.
