

Cisco Jabber

How Do I Screen Capture Images in Jabber?

To capture an image and send in Jabber:

1. In the Jabber Chat Window, look for the **Jabber Controls** at the bottom right area.

2. Click on the **Screen Capture** control button (Box highlighted in Red).

3. Click and drag the area that you would like to capture. Once the area is selected, release the mouse button to capture the screen.
4. The captured image will now be in the chat window. Hit **Enter** on your keyboard to send the captured image.
