

Cisco Jabber

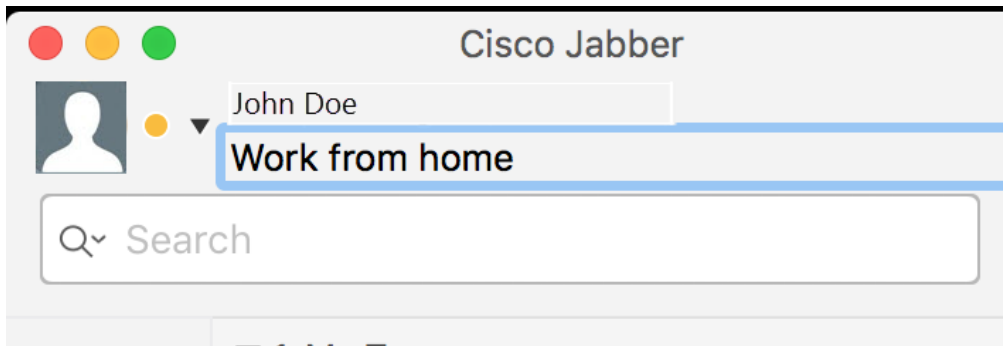

How Do I Update Status Messages in Jabber?

You can create up to three custom Jabber status messages for each presence indicator (Available, Away, Do Not Disturb). To create custom messages, follow the directions below.

1. Click on the **Down arrow** next to your status. Select the presence indicator you want to create the custom message for.

2. Overwrite the current message and type in your **new status message**.

3. Hit **Enter**.
