SECTION 3 - APPLICATION OF RATES

3.1 Flexible Pricing Plan

The rate ranges set forth in this tariff, where the symbol $\text{Min}/\text{Max}$ appears, are filed under a flexible pricing plan which establishes a range of prices, accepted by the Public Service Commission, within which changes may be made upon one day's notice to the Commission and Customers. Rates and charges for services provided by the Company will range between the minimum ($\text{Min}$) and maximum ($\text{Max}$) rates. Current prices for all services will be specified in Section 9 of this tariff.

3.2 Charges Based on Duration of Use

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

A) Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.

B) Billable time for service is the duration of time between the called station answering and the called or calling station disconnecting, provided duration may be rounded in accordance with specific descriptions in this tariff. Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.

C) Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.

D) All times refer to local time.

3.3 Rates Based Upon Distance

Where charges for a service are specified based upon distance, the following rules apply:

A) Distance between two points is measured as airline distance between the Rate Centers of the originating and terminating telephone lines. The Rate Center is a set of geographic coordinates, as referenced in Bellcore’s Local Exchange Routing Guide (LERG), associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company’s network (such as a dedicated toll free service or WATS access line), the Company will apply the Rate Center of the Customer’s main billing telephone number.
SECTION 3 - APPLICATION OF RATES (Cont'd)

3.3 Rates Based Upon Distance (Cont'd)

B) The airline distance between any two Rate Centers is determined as follows:

1) Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.

2) Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.

3) Square each difference obtained in step (2) above.

4) Add the square of the "V" difference and the square of the "H" difference obtained in step (3).

5) Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.

6) Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

7) Formula:

\[
\sqrt{\frac{(V1-V2)^2 + (H1-H2)^2}{10}}
\]
5.1 Message Toll Service (MTS)

MTS service is a measured use, full-time service and is offered on a monthly basis, utilizing interexchange communications facilities shared among multiple users. The individual customer’s basic monthly charges for the use of such intercity communications facilities are based upon the time of day, the total minutes the customer utilizes such facilities and the distance of each call. For each call under the MTS option, the minimum charge shall be the applicable charge for one minute of use with use in excess of one minute during a call charged at the applicable rate per minute with the fraction, if any, of the last minute of each call rounded up to the next highest whole minute, unless stated otherwise.

5.1.1 Dial USA

Dial USA is a one-way direct dial service utilizing 1+ or dial-up access, making use of common shared access lines connecting the customer with Company facilities.

A) Usage Charges

Usage charges are determined by the time of day rate periods and minutes of use within each rate period. The rate period is determined by the time and day of call origination at the customer’s location.

SECTION 5 - INTEREXCHANGE SERVICES (Cont'd)

5.2 Toll-Free Service

The Company Toll-Free Service is the furnishing of dial-type intrastate telecommunications originating on feature group facilities provided by the Local Exchange Carrier (LEC) and terminating on a Regular Business Line or a Special Access Line (SAL). This service enables the customer to receive toll-free service calls at their residence or place of business.

A) The Company reserves the right to require an applicant for Toll-Free Service to supply the following information when requesting service: an initial traffic forecast, identification of anticipated busy hour, identification of its geographical marketing target areas, and a schedule of marketing and promotional activities. The Company may also require that a new traffic forecast be submitted by the Customer quarterly after service is initiated.

B) Toll-Free Service is furnished upon condition that the customer contracts for adequate facilities to permit the use of this service without injurious effects upon it or any service rendered by the Company. The Company may terminate or refuse to furnish Toll-Free Service to any applicant, without incurring any liability and without notice to the customer, if the use of the service would interfere with or impair any service rendered by the Company.

C) Use of number(s): Each Toll-Free Service telephone number must be placed in actual and substantial use by the customer. “Substantial use” shall mean a pattern of use that demonstrates an intent on the customer's part to employ the number for the purpose for which it was intended; namely, to allow callers to reach the customer, as indicated, for example, by at least thirty (30) average monthly minutes of use or more. Any toll-free telephone number associated with Toll-Free Service that has not been placed in actual and substantial use during the first sixty (60) day period after service activation may be re-designated as a spare number in the SMS Toll-Free database by the Company upon written notice to the customer.

D) If the customer requests assignment of a specific Toll-Free Service telephone number, the Company may require the customer to submit a number reservation agreement form to the Company. At no time may a customer have more than ten (10) numbers reserved. Any reservation shall be for no more than sixty (60) days and shall be subject to a reservation fee which will be credited to the customer's unpaid balance after Toll-Free Service has been in actual and substantial use for a consecutive sixty (60) day period.

E) Nothing in this section, or in any other provision of this tariff, or in any marketing materials issued by or on behalf of the Company, shall give any person, including prospective customers who have reserved toll-free telephone numbers hereunder or customers who subscribe to and use the Company's Toll-Free Service or their transferee or assigns, any ownership interest or proprietary right in any particular toll-free number; however, upon placing a number actually and substantially in use, as defined above, Toll-Free Service customers do have a controlling interest in this toll-free number(s). Toll-Free Service customers may retain the use of their toll-free number assignments, even following changes in their toll-free carrier and/or Responsible Organization.
5.2 Toll-Free Service (Cont'd)

F) If a customer places an order for the Company to carry customer's already existing toll-free number service, the customer shall provide to Company the contact names, telephone number and address of the customer's Responsible Organization (Resp Org). Upon subscription to the Company's Toll-Free Service, the customer may execute a Letter of Authorization to transfer Resp Org responsibility of its toll-free number(s) to the Company Resp Org. If the customer elects to retain a non-Company Resp Org, the customer must notify the Company of any changes in the customer's Resp Org, in writing, within forty-eight (48) hours of the change. The customer is responsible for all outstanding indebtedness for services provided by a previous Resp Org or toll-free service carrier. The Company assumes no responsibility or liability with respect to any obligations of the customer to such previous service providers existing at the time of transfer to the Company.

G) It is the customer's responsibility to provide answer supervision back to the Company's point of connection even when the Toll-Free Service is connected to switching equipment or a customer-provided communications system. In such case, the equipment or system must provide appropriate supervision so that the measure of chargeable time begins upon delivery of the call to the customer's switching equipment or communications system and ends upon termination of the call.

H) Subject to execution of a Responsible Organization (Resp Org) Service Agreement between the Company and the customer, the Company Resp Org will perform the function of Resp Org for all Company Toll-Free Service orders unless the customer requests another Resp Org. Company Resp Org functions include: (a) search for and reservation of toll-free numbers in the SMS/toll-free; (b) creating and maintaining the toll-free number customer record in the SMS/toll-free; and (c) provision of a single point of contact for trouble reporting.

1) Where the Company serves as the Resp Org for an Toll-Free Service customer, the Company will, at the customer's request, subscribe to Toll-Free Directory Listing for the toll-free number(s) assigned to the customer. A charge for Toll-Free Directory Listings will apply as set forth in Section 4 of this tariff. In the event that a customer transfers its toll-free service to another Resp Org, the Company shall cease to subscribe to Toll-Free Directory Listing Service on behalf of the customer and the customer is responsible for assuring that Toll-Free Directory Listing Service is maintained through the new Resp Org. The customer is responsible for payment of any outstanding Toll-Free Directory Listing charges, including any unexpired portion of any minimum period applicable to such services, and the Company shall have no liability for any interruption or other delay, error, mistake, mission or other defect occurring in connection with the transfer of Toll-Free Directory Listing responsibility.
SECTION 5 - INTEREXCHANGE SERVICES (Cont'd)

5.2 Toll-Free Service (Cont'd)

H) (Cont'd)

2) Where the Company serves as the Resp Org for an Toll-Free Service customer, it will, at the customer's request, subscribe to Vertical Features obtained from Local Exchange Company access tariffs. When an Toll-Free Service customer uses Vertical Features obtained by the Company from Local Exchange Company (tariffs, a charge will apply. This charge may not be counted towards the attainment of any volume or revenue commitment and will not be discounted.

3) In the event that a customer cancels its Toll-Free Service, the customer may elect to retain Company as its Resp Org. Where the Company serves as Resp Org for a non-Company Toll-Free Service customer, a charge for Resp Org service will apply as set forth in Section 4 of this tariff.

4) In the event that a customer cancels its Company Resp Org or Toll-Free Service, the customer shall be responsible for all outstanding indebtedness to the company and any outstanding charges applicable to any services obtained by or on behalf of the customer by the Company.

5.3.4 Total Solution Gold Service

A) Description

Total Solution Gold Service is an offering which allows customers to select shared and dedicated outbound and inbound service arrangements, and obtain Term Plan discounts. Total Solution Gold calls are eligible for volume discounts based on total cross-contribution usage from all interstate and intrastate shared and dedicated outbound and inbound usage products (directory assistance and operator assistance are not contributory). Discounted rates apply retroactively, such that once the next dollar threshold is reached, the lower rate applies back to the first minute of usage for that billing period. Charges such as taxes, late payment fees or other service non-recurring and monthly recurring charges will not be included in the volume discount cross-contribution calculation.

The Outbound Calling Service arrangement is a long distance switched access service, which is available on either a shared or dedicated basis. The usage is billed on a flat rated basis. Outbound Calling Service calls are billed in 6 second increments, with an initial billing period of 18 seconds per call. Rates for Operator-assisted calls are set forth in Section 6.

The Inbound Calling Service arrangement is a toll free switched access service, which permits calls to be completed at the Customer's location without charge to the calling party. This service is available on either a shared or dedicated basis. Access to the service is gained by an end user dialing a 10 digit telephone number (e.g., 800/888+NXX-XXXX) which will terminate at the Customer's location. The usage is billed on a flat rated basis. Toll Free Service calls are billed in 6 second increments, with an initial billing period of 18 seconds per call. In addition, there is a non-recurring and monthly recurring Toll Free Service number charge, which will be applied either on a "per Toll Free Service number" basis for shared access or on a "per routing arrangement" basis for dedicated access (reference rates in Section 5.3.5.E.3).

5.3.4 Total Solution Gold Service (Cont'd)

B) Term Plans

Total Solution Gold Service is available on a month to month basis (only available to Customers having the service prior to September 3, 1996) or at discounted 1 or 2 year Term Plan rates. Term Plans are subject to a minimum monthly usage level of $500 for shared access or $2,500 after 90 days of initial service. Should the Customer's actual usage fall below the monthly minimum usage commitment, the Customer is required to pay the Company a fee equal to the difference between the Customer's actual usage and the Customer's minimum monthly commitment. Term Plan threshold calculations will include usage charges from all intrastate and interstate switched outbound and inbound usage products (directory assistance and operator assistance are not contributory). Charges such as taxes, late payment fees and other service non-recurring and monthly recurring charges will not be included in the Term Plan usage threshold calculation. A Customer who terminates a Term Plan prior to the term's expiration will be required to pay in one lump sum an amount equaling the monthly minimum service usage charge times the number of months remaining in the term.

A Customer may terminate their Term Plan without liability under the following conditions:

1) The customer requests, and remains on, a new Term Plan for a term equal to or greater than the time remaining on their current Company Term Plan.

2) The Customer provides written notification to cancel the Term Plan to the Company postmarked within 90 days of the commencement of the Term Plan. The Customer is responsible for payment of services used during this period.

Term Plans will be automatically renewed unless the Customer notifies the Company in writing to cancel the renewal within 30 days of expiration of the current Term Plan.

Toll Free Service calls are billed in 6 second increments, with an initial billing period of 18 seconds per call. In addition, there is a non-recurring and monthly recurring Toll Free Service number charge, which will be applied either on a "per Toll Free Service number" basis for shared access or on a "per routing arrangement" basis for dedicated access (reference rates in Section 5.3.5.E.3).

5.3.5 Total Solution Series 100x Service (Cont'd)

B) Commitment Levels and Term Plans

Total Solution Series 100x Service is available on a month to month basis or on an optional 1 or 2 year Term Plan. Discounts off the base rates are available to the Customer according to the commitment level and Term Plan selected by the Customer.

Total Solution Series 100x Service is subject to a minimum monthly usage commitment (after the third full month following the initial installation of service for new Customers) based on the Customer's selected commitment level. The commitment level is calculated from the monthly total of usage generated from the following Company products: shared and dedicated domestic interstate and intrastate outbound and inbound service, international outbound, intraLATA, local service, and calling card. Charges such as taxes, late payment fees or other service non-recurring and monthly recurring charges will not be included in the total usage amount calculation, as well as usage charges from Directory Assistance, Operator Service, voice mail and conference calling.

Should the Customer's actual usage fall below the monthly minimum usage commitment, the Customer is required to pay the Company a fee equal to the difference between the Customer's actual usage and the Customer's minimum monthly commitment. A Customer who terminates a Term Plan prior to the term's expiration will be required to pay in one lump sum an amount equaling the selected monthly commitment level times the number of months remaining in the term, plus an amount equal to any promotional credit, or discount, or waiver, if applicable, that was provided to the Customer.

A Customer may terminate their Term Plan without liability under the following conditions:

1) The Customer requests, and remains on, a new Term Plan for a term and commitment level equal to or greater than their current Company Term Plan and commitment level.

2) A new Customer (who was not receiving services through the Company prior to execution of the Term Plan) provides written notification to cancel the Term Plan to the Company postmarked within 90 days of the commencement of the Term Plan. The Customer is responsible for payment of services used during this period.

Term Plans will be automatically renewed unless the Customer notifies the Company in writing to cancel the renewal within 30 days of expiration of the current Term Plan.

5.3.7 Intelenet

A) Description

Intelenet offers a full service voice product for single or multi-location customers using switched or dedicated, and calling card origination and switched or dedicated toll-free termination. The Intelenet package includes a single flat rate for both peak and off-peak dedicated and switched usage and offers discounts for customers willing to sign a term commitment of month to month, twelve (12) or twenty-four (24) months and/or a willingness to commit to a specific dollar volume of monthly minimum usage.

The minimum monthly commitment will be based on net charges for service (after discounts have been applied) and must be reached by the fourth invoice period and monthly thereafter. Multiple services and/or multiple locations using Intelenet can contribute to the overall monthly commitment; however, the customer must allocate the minimum by service and location. All inbound and outbound domestic and international, calling card, intrastate service and internet access charges, including local services (if applicable) contribute to determining the monthly minimum usage with the exception of enhanced fax, conference calling and non-recurring charges.

If a customer’s monthly service usage charges for any month in the term are less than the monthly commitment agreed upon, the customer shall pay the company the difference between the monthly usage charges and the monthly commitment in addition to charges for service.

B) Service Agreement

When the customer has completed the term commitment, service will automatically be renewed for additional term(s) of the agreement unless the Company has received the customer's written notice to terminate the service on not less than sixty (60) days prior to the then existing term expiration date. Customers who terminate service prior to the end of the term in any manner other than stated will be liable for a service termination charge of an amount equal to the greater of the following, unless customer converts to another Company service with equal or greater term and minimum usage commitment:

1) If the termination becomes effective prior to the completion of the first year of the Customer Term, then the charge shall be an amount equal to the monthly billing commitment times the number of months remaining in Term through the expiration of the first year. If applicable, twenty-five percent (25%) of the balance remaining (monthly billing commitment times the number of remaining months in the Term beyond the first year) will also be included.

2) If the termination becomes effective after the completion of the first year, then the charge shall be an amount equal to twenty-five percent (25%) of the balance remaining (monthly billing commitment times the number of months remaining in the Term).

In addition, the customer will be required to repay any promotional credits that were applied, and any charges reimbursed or waived.

A Termination for Cause shall not be effective unless customer has reported trouble on an ANI or circuit-specific basis to (and received corresponding trouble ticket from) the appropriate Company Support Center and a period of not less than thirty (30) days after receipt of customer's written notice of termination has elapsed during which the Company fails to correct such quality deficiencies. Provided, nothing contained herein shall impose any liability on Company and customer's sole remedy shall be termination of the affected service as described.

H) Application of Nonrecurring and Ancillary Charges (cont'd)

3) Change of Requested Service Date

A change of Requested Service Date charge applies when a change of Requested Service Date is the only requested modification to the original Service order.

(a) If the first requested change of the Requested Service Date is received more than ten (10) working days prior to the Requested Service Date, there will be no charge.

(b) If the Requested Service Date has been changed once already, or if the request is made within ten (10) days of the original Requested Service Date, a charge will apply.

(c) An ASR charge will be assessed whenever a change of Requested Service Date is requested on Service orders including Company-ordered Local Access.

(d) When the Customer requests that its Requested Service Date be extended, the new Requested Service Date must be within thirty (30) days of the previously set Requested Service Date. If the new Requested Service Date is more than thirty (30) days beyond the existing Requested Service Date or unknown, the Service order must be canceled and re-issued when a confirmed date is set. A charge for a change of Requested Service Date also applies when the Customer requests an earlier Requested Service Date that does not require an Expedite. Should an Expedite be required, the Expedite Charge supersedes the change of Requested Service Date charge.

4) Change of Order Charges

(a) Charges apply when a Customer requests a modification to the information contained in the original Service order prior to Customer acceptance other than a change of Requested Service Date.

(b) Administrative Charges

If an ASR must be submitted to the Local Access Provider as a result of changes to Customer records such as billing address change, billing contact change, etc., then the Customer will be charged an ASR charge.

(c) Local Access Service Charges

Charges apply if the change requires a change in the original ASR or if a new ASR must be submitted.

5) Order Cancellation Charges

Charges apply for Service orders canceled prior to Customer acceptance. These charges are intended to supplement any Service Cancellation charges set forth in Section II. Order cancellation charges are in addition to standard Installation charges.

6) Change of Service Charges

Charges apply to changes made after acceptance by the Customer.

(a) Administrative Charges

If an ASR must be submitted to the Local Access Provider as a result of Customer-requested changes in Service, the Customer will be charged an ASR charge.

(b) Re-engineering Charges

Charges apply for orders that are re-engineered due to a Customer-requested change in local Service type. Changes which require only modification of Local Access, but do not affect Metro Frame Relay Service, will only be charged for the ASR. Any Local Access Provider charges incurred because of the change will be passed on to the Customer.

7) Application of Ancillary Charges

(a) Collocation Charges

Collocation charges may apply when a Customer contracts with Company to utilize space in Company Point-of-Presence locations for placement of Customer owned and maintained equipment associated with Services Company provides. All pricing for collocation including floor space, power, rack space, DSX-1 or DSX-3 cross-connect panels, etc., is dependent on Customer requirements.

K) Price Protection Plan

Customers who select a Service Commitment Period for Metro Frame Relay Service of one, two, three, four, or five years are automatically enrolled in the Price Protection Plan as described below. During the Service Commitment Period, Customer shall have the option to obtain the discount schedule for such Metro Frame Relay Service which is equal to Company’s then-current discount schedule under this Tariff for Metro Frame Relay Service (“Published Price”) upon the following conditions of the Price Protection Plan.

Under the Price Protection Plan, if at any time during the Service Commitment Period any discount rate on the applicable discount schedule is decreased (“New Discount Schedule”) for that Service the Customer will continue to be charged the discount in effect at the time the Service Commitment Period was initially selected. If any discount rate on the applicable discount schedule is increased (“New Discount Schedule”), the Customer may obtain affected Service with the New Discount Schedule by executing a new Service Order for the Service in question, subject to a Service Commitment Period which is equal to or greater than the Service Commitment Period of the original Service arrangement (“Revised Service Commitment Period”).

Any New Discount Schedule available to Customer pursuant to the foregoing provisions shall become effective with the commencement of the Revised Service Commitment Period as of a date not later than the first day of the latest calendar month/billing period occurring within the sixty (60) days next following Customer’s execution and submission of the above-referenced new Service Order to Company.

¹Effective January 21, 2003, Metro Frame Relay Service will no longer be available to new subscribers.

L) Revenue Plan Arrangements

1) Only by written Service Application, which is accepted by an authorized representative of Company, may Customers obtain a Revenue Plan Arrangement ("Revenue Plan") for the Metro Frame Relay Service. Each Revenue Plan shall be subject to a Customer Commitment Period (defined below) of at least one, two, three, four or five years. The period between the effective date of a Revenue Plan and the expiration of the Customer Commitment Period shall be referred to as the "Term" of the Revenue Plan.

2) From and after the effective date of a Revenue Plan and subject to the provisions of this Section, Customer may submit Service Orders for Qualifying Metro Frame Relay Service subject to the discounts in effect under this Tariff at the time the Service Application for the Revenue Plan is executed by Customer and Company. Subject to other applicable provisions of this Tariff, Company will accept such Service Orders provided the Requested Service Dates therefor do not occur later than a date six (6) months prior to the expiration of the Term ("Plan Installation Period").

3) The Service Commitment Period applicable to each Qualifying Metro Frame Relay Service shall be the longer of a period equal to: (i) the period commencing with the Start of Service Date therefor and continuing until the expiration of the Term applicable to the Revenue Plan in question; or (ii) six (6) months. Upon the expiration of the Term of a Revenue Plan, all monthly recurring charges relevant to Qualifying Metro Frame Relay Service (other than Qualifying Metro Frame Relay Service that has not completed its Service Commitment Period) will revert to Company's then current Base Rates and month-to-month Service Commitment Period discount, if any, applicable to Qualifying Metro Frame Relay Service then provided. Upon the expiration of the Service Commitment Period relevant to each Port comprising Qualifying Frame Relay, such Service will be subject to termination by either Customer or Company upon not less than thirty (30) days prior written notice to the other party.

(a) The lowest Minimum Monthly Commitment available for Revenue Plans is $2,500. The Minimum Monthly Commitment under a Revenue Plan will not include pro-rated charges for Metro Frame Relay Service, Local Access charges, Ancillary Service charges, Taxes or any other recurring and non-recurring charges for collocation of Customer equipment in Company POPs or other services provided to Customer by Company.

(b) The length of the Customer Commitment Period and the Minimum Monthly Commitment for both domestic WorldCom Frame Relay Service and Metro Frame Relay Service will determine the applicable discount of the Base Rates for Qualifying Metro Frame Relay Service, i.e., for purposes of determining the applicable discount of the Revenue Plan, the Customer Commitment Period equates to the Service Commitment Period in the discount schedules and the Minimum Monthly Commitment equates to the applicable Minimum Monthly level in the discount schedules.

In such case, Customer shall pay to Company all charges for such Service provided through the effective date of cancellation plus a cancellation charge determined as follows:

The Aggregate Base Rate Charge does not include pro-rated charges for Metro Frame Relay Service, Local Access charges, Ancillary Service charges, Taxes or any other recurring and non recurring charges for collocation of Customer equipment in Company POPs or other services provided to Customer by Company.

7) If Customer's Aggregate Base Rate Charge for any month in the Customer Commitment Period is less than the applicable Minimum Monthly Commitment, Customer shall pay Company the difference between the Aggregate Base Rate Charge for the month in question and the Minimum Monthly Commitment ("Deficiency Charge").

   (a) The Deficiency Charge shall be in addition to the charges for Qualifying Metro Frame Relay Service and all other Service provided pursuant to the Revenue Plan.

10) During the Customer Commitment Period, Customer shall have the option to obtain pricing for all Qualifying Metro Frame Relay Service which is equal to Company's then-current pricing, (i.e., Base Rates and discounts) under this Tariff for Qualifying Metro Frame Relay Service ("Published Price") upon the conditions of the Price Protection Plan described in Section K preceding with the following exceptions. 3) Directory Assistance
SECTION 8 - SPECIAL ARRANGEMENTS

8.1 Special Construction

A) Basis for Charges

Where the Company furnishes a facility or service for which a rate or charge is not specified in the Company's tariffs, charges will be based on the costs incurred by the Company and may include: (1) non-recurring type charges; (2) recurring type charges; (3) termination liabilities; or (4) combinations thereof.

B) Basis for Cost Computation

The costs referred to in Section A preceding may include one or more of the following items to the extent they are applicable:

1) cost installed of the facilities to be provided including estimated costs for the rearrangements of existing facilities. Cost installed includes the cost of:
   a) equipment and materials provided or used,
   b) engineering, labor and supervision,
   c) transportation, and
   d) rights of way;
2) cost of maintenance;
3) depreciation on the estimated cost installed of any facilities provided, based on the anticipated useful service life of the facilities with an appropriate allowance for the estimated net salvage;
4) administration, taxes and uncollectible revenue on the basis of reasonable average costs for these items;
5) license preparation, processing and related fees;
6) tariff preparation, processing and related fees;
7) any other identifiable costs related to the facilities provided; or
8) an amount for return and contingencies.
8.1 Special Construction (Cont'd)

C) Termination Liability

So the extent that there is no other requirement for use by the Company, a termination liability may apply for facilities specially constructed at the request of the customer.

1) The termination liability period is the estimated service live of the facilities provided.

2) The amount of the maximum termination liability is equal to the estimated amounts for:

   a) Cost installed of the facilities provided including estimated costs for rearrangements of existing facilities and/or construction of new facilities as appropriate, less net salvage. Cost installed includes the cost of:

      (1) equipment and materials provided or used,
      (2) engineering, labor and supervision,
      (3) transportation, and
      (4) rights of way;

   b) license preparation, processing, and related fees;
   c) tariff preparation, processing, and related fees;
   d) cost of removal and restoration, where appropriate; and
   e) any other identifiable costs related to the specially constructed or rearranged facilities.

3) The applicable termination liability method for calculating the unpaid balance of a term obligation. The amount of such charge is obtained by multiplying the sum of the amounts determined as set forth in Section 8.1.C.2 preceding by a factor related to the unexpired period of liability and the discount rate for return and contingencies. The amount determined in Section 8.1.C.2 preceding shall be adjusted to reflect the redetermined estimate net salvage, including any reuse of the facilities provided. This product is adjusted to reflect applicable taxes.
SECTION 8 - SPECIAL ARRANGEMENTS (Cont'd)

8.2 Individual Case Basis (ICB) Arrangements

9.11.2.10 Unified Enhanced Calling Card

Intermedia’s Enhanced Calling Card allows customers to make intrastate long distance calls when they are away from home or the office, and the calls will be billed to their card number. Intrastate service is provided in conjunction with the Company’s interstate offering. Calls are billed in six (6) second increments after a thirty (30) second per call minimum. All partial increments are rounded up to the next whole increment.

Calling Card Standard Service Components: The features and functions of the Calling Card are listed below:

Voice Prompts: Whenever a caller accesses Intermedia’s Card Service they will be guided by voice prompts. For the experienced user, the system will permit DTMF cut-through, which means they can dial over the voice prompts and not have to wait for the prompts to be completed.

14 Digit Authorization Code: All authorization codes will be 14 digits, consisting of a 10 digit card number plus a 4 digit PIN.

Re-Dial: This feature will allow the caller to return to the previous voice prompt if they should misdial during any part of the calling process, by holding down the * key, the cardholder will initiate this feature.

Credit Limit: A credit limit is established when the card is issued, preventing any additional calls to be made once the credit limit threshold has been reached. This is a real-time monitoring feature. When the cardholder reaches their credit limit threshold, however, the current call is not terminated. The next time they use their card a message will be played stating that the credit limit has been exceeded. It will prevent additional calls and request that the caller contact Intermedia Customer Service to rectify the problem.

# Re-Originate: The cardholder has the ability to make sequential calls without having to hang-up. By pressing the # key for 2 seconds, the caller will be prompted to enter the next number they wish to dial.

No Domestic Calling Surcharge: Intermedia does not charge a surcharge for any domestic or international terminations. There will be a payphone surcharge, however.

Speech Recognition: Speech recognition offers customers the ability to simply speak information into the telephone rather than enter the DTMF digits.

Speed Dial: Supports storage of up to 9 frequently dialed numbers

Voice Message Delivery: Messages can be recorded and delivered immediately or some date in the future

9.11.2.11 Unified Toll-Free Plus PIN

Unified Toll-Free plus PIN (800+PIN) service is a switched toll-free member of the Unified Long Distance family. Calls to subscribers are made by dialing the toll-free access number and then entering the subscriber’s 6-digit Personal Identification Number (PIN). PINs are generated by the Company and are not customer selectable. This service is not available on a stand-alone basis, but may be used in connection with any existing Intermedia long distance service(s) as an additional service for an existing customer. Calls are billed in whole minute increments. Partial increments are rounded up to the next full increment. Intrastate service is provided only in conjunction with the Company’s interstate offering.

There is no specific minimum or specific commitment for this product. There is, however, the requirement of a $250 minimum monthly total account commitment with a minimum term of 1 year. An existing account with less than a $250 commitment level that adds this service must increase the total account commitment to $250. Accounts that are not Unified Long Distance must be converted to a volume/term account with a minimum commitment of $250 per month and minimum term of 1 year. The customer’s liability for early termination of a term plan is the monthly revenue commitment times the months remaining in the term plan. Usage revenue generated by Unified Toll-Free plus PIN is applicable to the subscriber’s total account commitment.

9.11.2.13 Standard Features
When services herein are identified as including Standard Features, the following features will be included at no additional charge:

- Speed Dialing Codes - A three digit code dialed after the Authorization Code which permits the customer to reach a commonly called long distance number without dialing the long distance number.

- Additional Authorization Codes - Five (5) digit code used, usually, in areas that are still not equipped for equal access, to enable Intermedia to identify the use of the service on the customer's account.

- Generic Project Codes - A two (2), three (3), or four (4) digit code assigned by the customer and dialed after the long distance number. Project codes are not verified except as provided under "Verified Project Codes." Project codes are printed on the customer bill as part of the call detail record.

- Project Code Report - A report which consists of the complete call detail for the current month, sorted and subtotaled by project code.

- Verified Project Codes - A group of 2, 3, or 4 digit project codes within which a predesignated quantity of codes are valid. Assignment of valid codes is random. Calls placed with the remaining invalid codes will not be completed. Validation is accomplished by Intermedia's network switch.

- AT&T Call Cost Report - A report prepared at the time of monthly billing which lists all calls and equivalent AT&T cost, according to current AT&T tariffs on file, and approved by the appropriate regulatory body.

- Potential Call Abuse Report - A report prepared at the time of monthly billing which can list the 20 longest calls made during a billing cycle, or all calls placed during the Evening/Weekend time periods during a billing cycle. A combination of both reports can also be provided on request by a customer.

- Automatic Dialer Equipment - A device installed by Intermedia at the customer's premise which when activated, performs most or all of the "pre destination number." Automated Dialers are generally not provided where Equal Access is available.

9.11.2.14 Unified Directory Assistance
Unified Directory Assistance is available to Intermedia Customers. A Directory Assistance charge applies to each call to the Directory Assistance Bureau. When more than one class of service is involved, only the higher surcharge is applicable.

9.11.2.16 Low Billing Surcharge
In addition to all other nonrecurring, monthly recurring, or usage charges identified in Company tariffs, a monthly Low Billing Surcharge applies to stand-alone business accounts with total monthly long distance usage billing of less than $100, and to residential accounts with total monthly long distance usage billing of less than $25. This charge is cross-jurisdictional, i.e., the charge will not be applied in each jurisdiction of service within an account, but rather one charge will apply in connection with all relevant jurisdictions.

Monthly Surcharge, per account:
SECTION 9 - OBSOLETE SERVICES (Cont=d)

9.11 GRANDFATHERED INTERMEDIA SERVICES (Cont.)

9.11.2 Long Distance Services (Cont.)

9.11.2.17 Payphone Compensation Charge
In order to recover the Company’s expenses to comply with the FCC’s pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all interstate, intrastate, and international calls that originate from any domestic pay telephone used to access Intermedia services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with Intermedia service, applies for the use of the instrument used to access Intermedia service and is unrelated to the Intermedia service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Payphone Compensation Charge applies to the initial completed call and any reoriginated call (i.e., using the # symbol).

Whenever possible, the Payphone Compensation Charge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Payphone Compensation Charge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Payphone Compensation Charge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Payphone Compensation Charge, per call:

6. USE OF SERVICE (CONT.)

.07 MCI WorldCom Metered Use Service Option S (MCI 900)

.071 MCI WorldCom, pursuant to separate contract with a customer for MCI 900 Service, provided pursuant to this tariff, may undertake to enter into contractual arrangements with others to perform caller billing on behalf of the 900 Service customer. Such contracts may require, among other things, that the customer submit to MCI WorldCom a copy of all scripts of pre-recorded messages, to be placed on MCI WorldCom's 900 Service, along with a copy of any advertising and promotional materials, which MCI WorldCom in turn may furnish to those requested to perform the billing.

.072 A customer shall not use the MCI 900 Service to transmit obscene, indecent or otherwise unlawful messages. MCI WorldCom reserves the right to withhold service or discontinue service without notice if a message is unlawful.
SECTION 2 - RULES AND REGULATIONS

6. USE OF SERVICE (Cont.)

.07 MCI WorldCom Metered Use Service Option S (MCI 900) (Cont.)

.073 MCI WorldCom will use reasonable efforts to block MCI WorldCom 900 Service call origination from the following types of locations: public payphones; prisons; hospitals; educational institutions; and hotels and motels. Notwithstanding this undertaking, a customer shall remain responsible for charges for use of the MCI WorldCom network arising from calls placed to a Customer's 900 number(s) from such locations.

.074 A customer for MCI WorldCom 900 Service shall reasonably disclose to potential callers in promotional materials, which shall include but not be limited to all written or broadcast advertising, the charges to be billed to callers using the service.

.075 MCI WorldCom reserves the right to change a customer's 900 Service number and may do so upon providing the customer with at least seven days' notice of the change.

.076 If a customer of MCI WorldCom 900 is found to be non-compliant in passing back appropriate answer supervision, MCI WorldCom reserves the right to suspend service temporarily and/or deny requests for additional service. MCI WorldCom shall give the customer 10 days written notice via certified U.S. Mail of intent to suspend or deny service due to such non-compliance.

.077 Nothing in this section, or in any other provision of this tariff, or in any marketing materials issued by the company, shall give any person, including prospective customers who have reserved MCI WorldCom 900 telephone numbers hereunder or customers who subscribe to and use MCI WorldCom 900 Service, or their transferees or assignees, any ownership interest or proprietary right in any particular MCI WorldCom 900 Service telephone number; provided, however, that if an MCI WorldCom 900 Service customer who has been assigned a 900 Service number by MCI WorldCom enters into an arrangement with a third party or agent, the effect of which is to allow, among other things, termination of the 900 MCI WorldCom Service number at the facilities of such third party or agent in order to facilitate the customer's use of MCI WorldCom 900 Service, then the customer may retain the 900 Service telephone number subsequent to its disassociation from the third party or agent if the 900 Service customer continues as an MCI WorldCom customer, as defined in Section 1 of this tariff. If an MCI WorldCom 900 Service customer terminates the service, or if MCI WorldCom terminates service to the customer, any MCI WorldCom 900 Service telephone number which may have been assigned to a said customer will be forfeited and will revert to MCI WorldCom.

.0223 TDS-45 Inter-Office Functions

.02231 Monthly Plan (per Inter-Office Channel)
The IOC connects two MCI WorldCom terminals on MCI WorldCom's digital fiber optic network. The IOC consists of two rate components - a fixed rate element per channel as well as a per mile rate element applied for the length of the TDS-45 channel.

MCI TDS-45 mileage is calculated by adding together the airline mileage of those route sections needed to provide the TDS-45 IOC.

.02232 Fixed Term Plan:² Under these plans, a customer may order individual circuits for fixed terms of 1, 2, 3, 4, or 5 years. The monthly recurring IOC charges under a particular plan are determined by deducting the applicable discount from the monthly charges calculated using the per circuit and per mile rates of the Monthly Plan.

A customer may terminate a Fixed Term Plan or Plans before the end of the committed term or terms without liability, if:

- a revision in this Tariff results in a higher IOC rate for the Plan to which the customer has committed, and to which higher IOC rate the customer has not given written consent;
- the customer enrolls the TDS 1.5 IOC in a new Fixed Term Plan which expires on or after the expiration date of the existing Plan;
- the customer replaces the existing Fixed Term Plan or Plans with a Network Pricing Plan for which minimum committed revenue over time, calculated by multiplying the number of months in the term of the plan by the minimum monthly IOC revenue commitment amount, is equal to or exceeds the amount determined by summing the IOC charges, calculated using the Monthly Plan rates, of the circuits in the Fixed Term Plan or

.04 Option C (MCI WATS)¹

Option C involves the provision of intercity communications channels. Option C is a one-way, multipoint service requiring the customer to originate calls via dedicated facilities between his premises and MCI WorldCom's terminal location and allowing the termination of calls via a combination of MCI WorldCom-provided intercity facilities and local business telephone lines, and the resold facilities of other carriers. All Option C calls are subject to a one minute average connect time (i.e. total monthly minutes of use divided by total monthly calls must equal at least one minute). All Option C calls are rounded to the next higher 6-second increment.

The Company does not invoice charges in fractions of a cent; the minimum charge for any charge element is $0.01.

.041 Monthly Recurring Charges

.0411 Intercity Facilities Usage Charges: Option C is available on the basis of usage charges and is subject to a monthly Minimum Charge.

.04111 Minimum Charge: (for all usage) See Price List

.04112 Usage Charges: Usage Charges are determined by such variables as Rate Periods, Rate Schedules and Service Areas. The charges are billed according to the average monthly use for each rate period of each dedicated access line within a service group.* (See definition of "Service Group" in Section A preceding.) The rate period is determined by the day and time at the Option C dedicated access line location.

a) RATE PERIODS:
   Business Day Period
   8:00 a.m. through 5:00 p.m. Monday through Friday
   Evening Period
   5:00 p.m. through 11:00 p.m. Sunday through Friday and all day on MCI WorldCom-recognized National Holidays except when a lower rate would normally apply.
   Night and Weekend Period
   11:00 p.m. to 8:00 a.m. all days, 8:00 a.m. to 11:00 p.m.
   Saturday, 8:00 a.m. to 5:00 p.m. Sunday

* The average monthly minutes of use for each rate period per access line will be deemed to be the same as the average monthly minutes of total traffic (including traffic to Canada) for each rate period. The resulting effective per minute rate will then be applied to the customers Tier 1 and Tier 2 usage, respectively.

¹Beginning April 5, 1994, Option C, (WATS) will not be available to new subscribers.

c) SERVICE AREAS
Service Areas (S.A's) represent broad geographical areas which encompass specific locations to which the customer subscribes. The Service Areas are designated S.A one through S.A. five and each higher Service Area includes service to all lower numbered Service Areas. See Section 3-7, Table III, Part C, for complete geographical coverage of Service Areas.

.04 Option C (MCI WATS)

.041 Monthly Recurring Charges (CONT.)

.0411 InterCity Facilities Usage Charges (Cont.):

.04113 Method of Determining Usage Charges
Based upon the hourly rates set forth in Section 3-3.041122, MCI WATS usage charges are calculated as described below:*

a) Determine the total minutes of monthly usage for each rate period over all dedicated access lines in a service group.

b) Determine the total number of access lines in service during the month (access lines in service for a partial month will be pro-rated).

c) Determine the average usage for each rate period per access line by dividing the minutes for each rate period from (a) above by the number of lines from (b) above.

d) Determine the effective rate step for the desired service area from the appropriate originating state.

e) Determine the effective Tier 1 hourly rate for each rate period by: 1) Multiplying the total hours in each tapered usage increment for that rate period by the associated hourly rate for that increment; 2) totaling these charges for each rate period; and 3) dividing the total by the average usage per line from (c) above.

f) Repeat step (e) for Tier 2 usage.

g) Determine the Tier 1 usage charge for each rate period by multiplying the effective Tier 1 hourly rate per rate period from (e) above by the total Tier 1 hours of monthly use in a service group for each rate period, respectively, and totaling these charges.

h) Repeat step (g) for Tier 2 usage by using the effective Tier 2 hourly rate per rate period as determined in (f) above.

i) Determine the total Tier 1 and Tier 2 usage charge for all rate periods in each service group by adding the results of (g) and (h) above.

* Minutes used in the calculation include both intrastate and interstate minutes.

For each networkMCI Contact one-number service customer (Subscriber), MCI WorldCom will designate a networkMCI Contact one-number service Number and a 6-digit security code which permits the Subscriber to manage service features and call routing features. For each networkMCI Contact one-number service call, there are two parties: the "Subscriber", the party at whose designated location(s) the networkMCI Contact one-number service call terminates, and the "Calling Party", the party who places the call. The Subscriber is the customer and is subject to all applicable provisions in this tariff which pertain to customers.

Unless otherwise specified, all networkMCI Contact one-number service calls are subject to a 30-second minimum duration, with additional 6-second increments and are rounded to the next higher 6-second increment. SECTION 3 - SERVICE DESCRIPTIONS AND RATES

4. CCSA SERVICE

.01 General Description

.011 CCSA Service does not involve the provision of intercity communications channels, but rather is offered as a switching service interconnecting network trunks, including circuits and services provided either by MCI WorldCom or by other Participating Carriers. Use of MCI WorldCom's common control switching machines in connection with this offering may be shared with other customers or other offerings.

.012 Two customer options are available under this service: A full service version, Option A (Telemanagement) and a limited service version, Option B (Least Cost Routing). Outlined below are the features available, at the customer's option, which are included under the basic monthly recurring charges, along with the limitations associated with each option:

\[\text{Customers who elect to gain access to MCI's Metered Use Service Option C (MCI WATS) in connection with CCSA Service will be billed for monthly usage on the basis of the Tier 1, Service Area 5, hourly rates specified in Section C-3.041122 for their respective originating city. However, for such CCSA-related Metered Use Service Option C usage, the average monthly minutes of use for each rate period per access line will be calculated based upon the average monthly minutes of total traffic for each rate period per CCSA Dedicated Access Arrangement. The resulting effective per minute rate for Tier 2 usage will remain unaffected by the above.}\]

SECTION 3 - SERVICE DESCRIPTIONS AND RATES

6. RATE & MILEAGE TABLES

   METHOD FOR CALCULATION FOR AIRLINE MILEAGE

   PART A. Method of Calculation

   The airline mileage between two cities can be calculated using the Vertical (V) and Horizontal (H) Coordinates as obtained by reference to AT&T's Tariff F.C.C. No. 10 according to the following formula:

   \[ \sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}} \]

   where \( V_1 \) and \( H_1 \) correspond to the V & H coordinates of City 1 and \( V_2 \) and \( H_2 \) correspond to the V & H coordinates of City 2.
SECTION 3 - SERVICE DESCRIPTIONS AND RATES

6. RATE & MILEAGE TABLES

Part A: METHOD FOR CALCULATION FOR AIRLINE MILEAGE

1. DEDICATED LEASED LINE SERVICE (CONT.)

Example:

<table>
<thead>
<tr>
<th>City</th>
<th>V</th>
<th>H</th>
</tr>
</thead>
<tbody>
<tr>
<td>City 1 - Columbus</td>
<td>5972</td>
<td>2555</td>
</tr>
<tr>
<td>City 2 - Cincinnati</td>
<td>6263</td>
<td>2679</td>
</tr>
</tbody>
</table>

\[
\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}
\]

Airline Mileage = 101 miles \(\frac{100.0299}{10,006.0} = 100.0299\) miles*

2. METERED USE OF SERVICE

To determine the mileage between any two cities proceed as follows:

1. Obtain the "V" and "H" coordinates for each city.
2. Obtain the difference between the "V" coordinates of the two cities. Obtain the difference between the "H" coordinates. Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

* Result will always be rounded to the next highest mile.

3. Divide each of the differences obtained in 2 by three, rounding each quotient to the nearer integer.

4. Square these two integers and add the two squares. If the sum of the squares is greater than 1777, divide the integers obtained in 3 by three, and repeat step 4. Repeat this process until the sum of the squares obtained is less than 1778.
SECTION 3 - SERVICE DESCRIPTIONS AND RATES

6. RATE & MILEAGE TABLES

2. METERED USE OF SERVICE (CONT.)

To determine the mileage between any two cities proceed as follows (Cont.):

5. The number of successive divisions by three in steps 3 and 4 determines the value of "N". Multiply the final sum of the two squares obtained in step 4 by the multiplier specified in the following table for this value of "N" preceding:

<table>
<thead>
<tr>
<th>N</th>
<th>Multiplier</th>
<th>Minimum Rate Mileage</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>0.9</td>
<td>-</td>
</tr>
<tr>
<td>2</td>
<td>8.1</td>
<td>41</td>
</tr>
<tr>
<td>3</td>
<td>72.9</td>
<td>121</td>
</tr>
<tr>
<td>4</td>
<td>656.1</td>
<td>361</td>
</tr>
<tr>
<td>5</td>
<td>5,904.9</td>
<td>1,081</td>
</tr>
<tr>
<td>6</td>
<td>53,144.1</td>
<td>3,241</td>
</tr>
</tbody>
</table>

6. Obtain square root of product in 5 and, with any resulting fraction, round up to next higher integer. This is the rate mileage except that when the mileage so obtained is less than the minimum rate mileage shown in 5 preceding, the minimum rate mileage corresponding to the "N" value is applicable.

Example:

The rate mileage between Columbus, and Cincinnati is calculated as follows:

\[
\begin{array}{c|c|c}
V & H \\
\hline
\text{Columbus} & 5972 & 2555 \\
\text{Cincinnati} & 6263 & 2679 \\
\text{difference} & 291 & 124 \\
\end{array}
\]

(c1) divide each difference by three and rounding to the nearer integer = 97 and 42

(d1) square integers and add, \( 97 \times 97 = 9,409 \)

\( 42 \times 42 = 1,764 \)

\( 11,173 \)

This sum of squared integers is less than 1778 and was obtained after four successive divisions by three, therefore, "N" = 1.

(e) Multiply final sum of squared integers by factor .9 (corresponding to "N" = 1)

\[
\frac{11,173 \times .9}{10,055.7}
\]

(f) Square root of 10,955.7 = 101.

SECTION 4 - RATES FOR SUPPORTIVE SERVICES

1. General Description of Supportive Services

.01 Supportive services are those for which MCI WorldCom has established rates to cover various areas of support to satisfy certain customer requirements which are considered supplemental to those areas normally provided by MCI WorldCom as part of its service.

2. Supportive Services for Joint and Authorized Usage

.01 Supportive Services are provided to subscribers to MCI WorldCom’s services who are acting on behalf of joint users or authorized users. MCI WorldCom, at its option, and subject to the provisions of Section 3-6 preceding, will support the customer's interaction and administrative involvement with the joint and authorized users as outlined in Sections 4-2.02 through 4-2.04 following.

.02 At the customer's option, additional Supportive Services are available for all MCI WorldCom services at the daily rate set forth below. These Supportive Services include, but are not limited to, such areas as training of customer personnel, administration of joint or authorized user groups, compilation and generation of information necessary for submitting and processing an Application for Service, etc.

- $500 per day - customer is also responsible for all travel and per diem expenses.

.03 Engineering or sales support by MCI WorldCom to assist the customer in interactions with joint or authorized users may be requested by the customer. In this case, the rates in Section 4-4 apply.

3. Special Construction

.01 Basis for Rates and Charges

Rates and charges for special construction will be based on the costs incurred by MCI WorldCom and may include (A) non-recurring type charges, (B) recurring type charges, (C) termination liabilities, (D) underutilization liabilities, or (E) combinations thereof.
3. **Special Construction (Cont.)**

   **.02 Basis for Cost Computation**

   The costs referred to in .01 preceding may include one or more of the following items to the extent that they are applicable:

   **.021** Cost installed of the facilities to be provided, including estimated cost for rearrangements of existing facilities. Cost installed includes the cost of:

   (a) equipment and materials provided or used,
   (b) engineering, labor and supervision,
   (c) transportation, and
   (d) rights-of-way

   **.022** Cost maintenance,

   **.023** Depreciation on the estimated cost installed of any facilities provided, based on the anticipated useful service life of the facilities with an appropriate allowance for the estimated net salvage,

   **.024** Administration, taxes and uncollectible revenue on the basis of reasonable average costs for these items,

   **.025** License preparation, processing and related fees,

   **.026** Tariff preparation, processing and related fees,

   **.027** Any other identifiable costs related to the facilities provided,

   **.028** An amount for return and contingencies.

   **.03 Termination Liability**

   To the extent that there is no other requirement for use by MCI WorldCom, a termination liability may apply for facilities specially constructed at the request of the customer to meet its requirements.

   **.031** The termination liability period is the estimated service life of the facilities provided.
SECTION 4 - RATES FOR SUPPORTIVE SERVICES

3. Special Construction (Cont.)

   .03 Termination Liability (Cont.)

       .032 The amounts of the maximum termination liability is equal to the estimated amounts for:

       (a) Cost installed of the facilities provided including estimated costs for rearrangements of existing
           facilities and/or construction of new facilities as appropriate, less net salvage. Cost installed
           includes the cost of:

           (i) equipment and materials provided or used,
           (ii) engineering, labor and supervision,
           (iii) transportation, and
           (iv) rights-of-way

       (b) License preparation, processing, and related fees,

       (c) Tariff preparation, processing, and related fees,

       (d) Any other identifiable costs related to the specially constructed or rearranged facilities.

       .033 The applicable termination liability charge is based on the normal method for calculating the unpaid
           balance of a term obligation. The amount of such charge is obtained by multiplying the sum of the
           amounts determined as set forth in .032 preceding by a factor related to the unexpired period of liability
           and the discount rates for return and contingencies. The amount determined in .032(a) preceding shall
           be adjusted to reflect the predetermined estimated net salvage, including any reuse of the facilities
           provided. This product is adjusted to reflect applicable taxes.

   .04 Underutilization Liability

       To the extent that there is no other requirement for use by MCI WorldCom, a charge may apply after an
       initially agreed upon period, and annually thereafter for voice grade type facilities or a portion thereof specially
       constructed to meet the forecasted needs of the customer between the customer's terminal location and MCI
       WorldCom locations, where the customer utilizes such facilities in an amount less than 70 percent of its
       forecasted requirements.

   .05 Ownership of Facilities

       Title and/or right to possession to all facilities provided in accordance with this tariff remains in MCI WorldCom
       and/or its affiliates.
